5 YRS  2015-2020

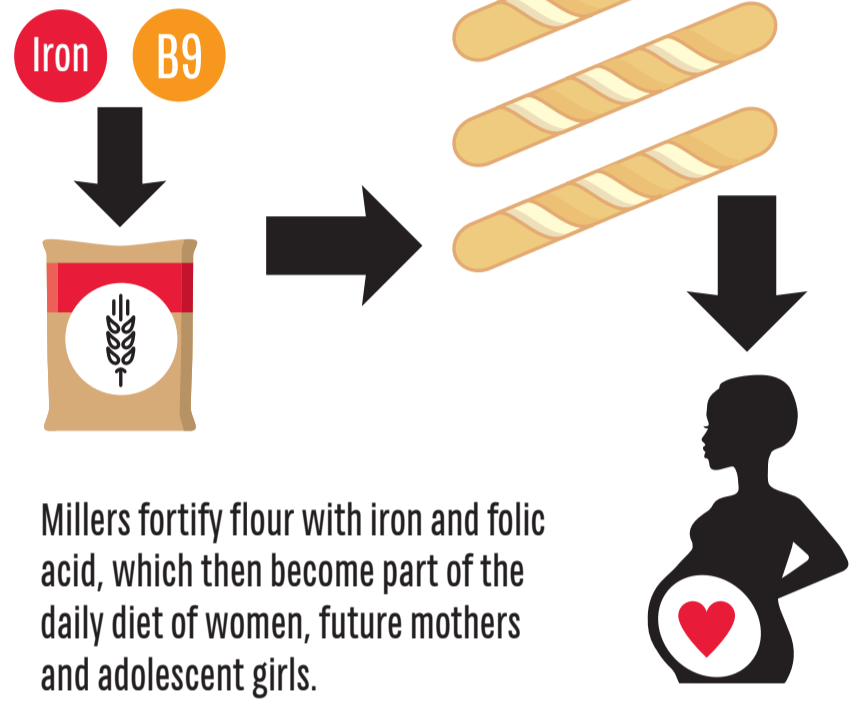

Improving the quality of nutrition for women and adolescent girls

Interventions

Weekly supplementation

Fortification of wheat flour across the country

Reach

2 out of **3**

adolescent girls attending school in Senegal

Weekly supplementation will reach 1.2 million female students in the regions of Dakar, Kaolack, Kolda, St. Louis, Sédhiou, Thies and Ziguinchor by 2020.

Millers are trained and equipped to fortify flour with iron and folic acid. The entire wheat flour production in Senegal will eventually be fortified.

Impact

Increase in school attendance among adolescent girls.

Increase in academic performance.

More energetic and productive women and adolescent girls.

Reduction in cases of neural tube defects (spina bifida.)

Survival and health of protected mothers.

This program contributes to the achievement of the World Health Organization's Global Nutrition Targets 2025.

In collaboration with the Government of Canada and the Government of the Republic of Senegal.
